

QR Sticker

Greetings! In an effort to establish a more seamless service event, our support team has rolled out our QR sticker identification. When scanned, this QR will provide repairing facilities TEL's "BILL TO" account information. This info is instrumental in starting a service event off on the right foot.

Please follow the below instructions for installation/registration of the QR sticker.

Figure 1 Peterbilt QR Orientation

Figure 2 Freightliner, Kenworth and Volvo QR Orientation

Installation

Please install the QR sticker as depicted in one of the images to the left. Ensure the surface on the tractor is clean before installing the sticker.

Please note: the sticker orientation is specific to the OEM make. (See Figure 1 and Figure 2)

Registration

Once the QR sticker is installed, please scan the QR code with a Smart Phone or Tablet to complete the registration process.

You will be brought to a page to input the last 8 of the VIN. Next, you will be prompted to upload a picture of the VIN data plate currently on the vehicle. Once the upload is finished registration is complete.

Use

Now that the sticker is installed and registered it is ready to be used. In the event you have a need to visit one of our service providers, please reference the QR sticker to the provider at the time of service write up.
